

Viggen EPS 2663 NH

High-performance neat cutting oil

Product Data

Description

Viggen EPS 2663 NH is a Very High Performance Chlorine and Zinc free neat cutting oil based on the highest quality group 3 VHVI hydrocracked base stock.

Benefits

- High cutting performance enhanced by a unique additive pack
- Low mist due to single 'crack' synthetic base oil
- Low foam levels even at high coolant pressures
- Low levels of carry over on components and swarf due to low viscosity
- Light colour due to pure base oil (food grade)
- Low odour formulation improves working environment
- High flashpoint
- Long life due to oxidation resistance
- Good environmental properties due to chlorine and heavy metal free formulation
- Non-staining

Applications

Viggen EPS 2663 NH is primarily designed for the machining of tough alloys, high tensile steels, aluminium alloys and yellow metals.

Technical Specifications

Name	Units	Value
Appearance		Golden to light straw
Odour		Light and oily
Viscosity @ 40°C	mm ² /s	26
Cleveland Flash Point	°C	195
Copper Corrosion		1a

Packaging

Available in 20 Litre, 208 Litre, and 1000 Litre.
